- * [[National Bank for Agriculture and Rural Development|NABARD]]

Non-governmental organizations focused on global health include:

- * [[Médecins Sans Frontières]] (Doctors Without Borders, MSF)
- * [[Bill & Melinda Gates Foundation]]

=== Global Health Security Agenda ===

The Global Health Security Agenda (GHS) is "a multilateral, multi-sector effort that includes 60 participating countries and numerous private and public international organizations focused on building up worldwide health security capabilities toward meeting such threats" as the spread of infectious disease. On March 26–28, 2018, the GHS held a high-level meeting in Tbilisi, Georgia, on **big**surveillance of infectious disease threats, "which include such modern-day examples as HIV/AIDS, [[Severe acute respiratory syndrome|severe acute respiratory syndrome (SARS)]], [[H1N1 influenza]], [[Multi-drug-resistant tuberculosis|multi-drug resistant tuberculosis]] – an emerging or reemerging disease that threatens human health and

Global health security [edit source]

The COVID-19 pandemic has highlighted how global health security is reliant on all countries around the world, including low- and middle-income countries, having strong health systems and at least a minimum of health research capacities. In an article 2020 in *Annals of Global Health*,^[66] the ESSENCE group outlined a mechanism for review of investment in health research capacity building in low- and middle-income countries. The review mechanism will give funders of research for health the information to identify the gaps in capacity that exist in low- and middle-income countries and the opportunity to work together to address those disparities. The overall goal is increased, coordinated support of research on national health priorities as well as improved pandemic preparedness in LMICs, and, eventually, fewer countries with very limited health research capacity.

Organization [edit source]
